

Other countries where Adobe Curriculum has been adopted by the Ministry of Education

Scotland

National Announcement of Adobe Certified Associate exams as an option for students to obtain academic diplomas – Scottish Qualifications Authority, Scotland Teaching and Learning

Russia

Russia has some 40 million students, 64,000 primary school and 5,000 Universities. Adobe products will be included in all curriculums and school programs, millions of K-12 student will start studying design and video technologies using legal Adobe products to be competitive in the 21st Century.

Ministry of education has started a program called Smart Schools. Under Smart Schools, the staff is equipped with the latest hardware & software and all the MOE teachers/staff are given laptops. These laptops were initially only bundled with Microsoft Office. Our proposal was to include Adobe Presenter on the laptops for easy digital/Multimedia content creation. This year alone, MOE is giving laptops to 60,000 MOE teachers. Apart from Office, Adobe Presenter is the only software now to be bundled with all the Laptops

United Kingdom (England & Wales)
