SMA 100

**On-Demand
Microfilm Scanner
for 16 and 35 mm**

SMA 100

On-Demand Microfilm Scanner for 16 and 35 mm Rolfilm

This desktop systems with 8x preview viewing lens is small, compact and economical. It produces exceptional, sharp and clear scanned images with even light and contrast corner-to-corner, in truly archival quality at a fraction of the price of other microfilm scanners.

The scanner includes a manual roll film carrier, a user friendly operator's software, Adobe PhotoShop Elements and "Instant Print" software for Reader Printer functionality. The SMA 100 is also capable to scan slides, color foto negatives and color microfilm.

The SMA 100 scans directly from the film and avoids the disadvantages of scanning a displayed image as the scan is not effected by ambient light.

For more comfortable use with digital film viewer which displays the microfilm image live on an integrated monitor please ask for the SMA 200. This model is also available with motorized roll film carrier.

SMA 200 with Manual Carrier

SMA 200 with Motorized Carrier
